48	Our story
	Studio and label

We are our own clients. Our design process begins by envisioning ourselves as the end-user, designing each new model based on how we prefer to experience music and the attributes we find valuable in sound quality.

We are our products. Each model is produced from beginning to end by a single craftsman, instilling a level of ownership that ensures consistency and attention to detail throughout the manufacturing process.

We are a family. Our goal is to create something together, that we believe in, tailored for clients that share our passion, values and tastes.

NEW

Coltrane Quintet

Coltrane Quintet leads the series into the next level of Marten sound. We've pushed our design forward with a suite of new and custom drivers, coupled with enhancements in cabinet construction for advanced resonance reduction. Coltrane Quintet still has the iconic looks, but takes the sound up a notch with a deeper bass response, vivid soundstage and the dynamic range you've come to expect from a Coltrane.

See page 12

SERIES

Coltrane

The Coltrane series has long been a trailblazer, featuring some of our most esteemed models to date, influencing technological innovation and product design. This series showcases a select choice of components and our meticulous handcraft, with some models taking hundreds of hours to produce.

This year, we proudly introduce Coltrane Quintet, an update to our iconic series. With unparalleled power and dynamics, this speaker embodies the culmination of our current knowledge and design sensibilities, delivering a true show of strength.

COLTRANE

Supreme 2

Coltrane Supreme 2 Mk2 is the pinnacle of the Coltrane Series. From its inception our aim was clear: to craft an unrivalled home speaker.

We spared no expense in selecting the finest materials to realise this vision. The result is a speaker that offers a naturally open and dynamic sound, accompanied by a soundstage that defies belief until experienced firsthand. Designed with our state-of-the-art recording studio in Sweden as reference, Coltrane Supreme 2 Mk2 blurs the line between reality and recorded sound, delivering music that is virtually indistinguishable from live performance.

The intricate manufacturing process involves crafting a dual layer cabinet with an inner compartment made of laminated wood and an outer casing crafted from a combination of carbon fibre and solid wood. Each tower has a three-part cabinet that is used to isolate the treble and midrange frequencies from the bass. This minimises resonance between drivers handling different frequency bands, resulting in accurate audio across the spectrum.

As a driving force behind Marten's continuous design and technological innovations, Coltrane Supreme 2 Mk2 has influenced significant breakthroughs across our product range, ensuring that it remains at the forefront of the market.

FEATURES

- 5-way
- Pure diamond tweeter
- Accuton Cell drivers
- 6 Passive radiators
- Dual layer carbon fibre cabinet
- 3 part cabinet for bass and midrange isolation
- World-class woodwork
- First order crossover
- Jorma Statement internal wiring
- Marten Isolators

See page 42 for finishes

STATEMENT

Coltrane Supreme 2 Mk2 features Jorma Statement internal wiring and our most advanced crossover with the highest quality components.

COLTRANE

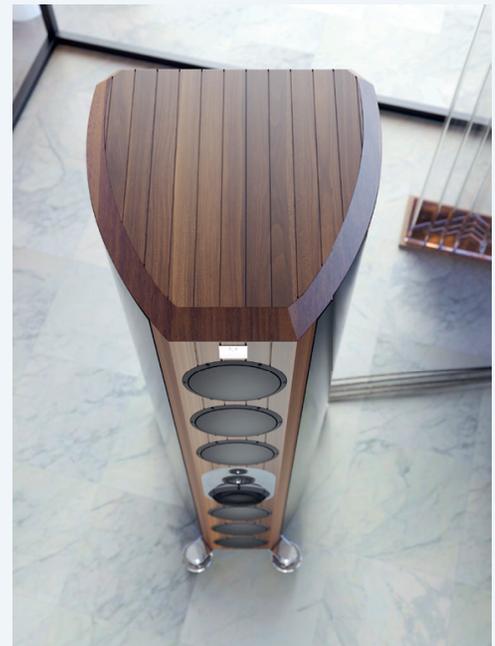

Momento 2

Beneath the imposing exterior of Coltrane Momento 2 lies cutting-edge technology that rivals the industry's finest. With its enhanced full-picture sound, Coltrane Momento 2 brings music to life in a way that sounds just as it did the first time you heard it.

Coltrane Momento 2 utilises our signature first order crossover, ensuring impeccable time and phase coherence, as well as flawless time coincidence. Crafted with the utmost attention to detail and using only the finest materials, including pure diamond drivers, carbon fibre, and Jorma wiring, this speaker delivers crystal-clear sound with rich dynamics and deep, controlled bass. The result is a vivid soundstage that faithfully reproduces performances with unparalleled realism.

The cabinet is created using an intricate manufacturing process to create a dual layered cabinet, comprising an inner section fashioned from laminated wood and an outer shell constructed from a combination of carbon fibre and solid wood.

FEATURES

- 4-way
- 1" diamond high tweeter
- 2" diamond low tweeter
- Accuton Cell drivers
- 4 Passive radiators
- Dual layer carbon fibre cabinet
- World-class woodwork
- First order crossover
- Jorma internal wiring
- Marten Isolators

COLTRANE

Quintet

Coltrane Quintet is the long awaited update to the original Coltrane model, but it's more than an upgrade. It captures everything we currently know about speaker design. Behind the classic good looks of Coltrane lies something powerful.

With an enviable complement of drivers, it features our custom pure diamond and custom pure beryllium drivers, as well as a new custom convex carbon fibre mid-bass and new aluminium sandwich 10" drivers.

The cabinet is 25% bigger offering better response in the low bass frequencies. It's also more rigid, designed for greater resonance control. The front plate has been designed for stability: thicker and with more contact points for lower resonance. The polished carbon fibre cabinet reveals the beauty and strength of the material that is intrinsic to Coltrane design.

FEATURES

- 4-way bass reflex
- Custom pure diamond tweeter
- Custom pure beryllium high-midrange
- Custom convex carbon fibre mid-bass
- Aluminium sandwich bass
- Signature First Order crossover
- Jorma internal wiring
- Marten Isolators

See page 43 for finishes

STATEMENT EDITION

Coltrane Quintet can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

COLTRANE

3

Coltrane 3 embodies the quintessence of a Coltrane speaker with crystal clear high resolution sound and deep controlled bass; all impeccably crafted using premium materials. This 3-way bass reflex system features a pure diamond tweeter for unparalleled clarity and detail. The first-order crossover ensures seamless integration of frequencies, delivering an immersive listening experience. Designed for both sonic excellence and aesthetic appeal, its lounge-friendly cabinet incorporates Marten Isolators to help minimise resonance, enhancing dynamic bass response and providing superior power and control.

FEATURES

- 3-way bass reflex
- Pure diamond tweeter
- Accuton Cell drivers
- Carbon fibre cabinet
- First order crossover
- Jorma internal wiring
- Marten Isolators

See page 43 for finishes

Coltrane 3 can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

SERIES

Mingus

Leveraging our vast experience and expertise, particularly in crossover, driver handling, and resonance reduction, the Mingus series sets a new standard for excellence. With the clarity of pure diamond, powerful dynamic bass, and an expansive, distortion-free soundstage, Mingus speakers are not only exceptional in performance, but also lounge-friendly.

MINGUS

Orchestra

Mingus Orchestra—the pinnacle of the Mingus series—boasts the unparalleled strength and clarity of Diamond drivers. Integrating seamlessly into its sturdy yet elegant cabinet, our trusted design and technology are flawlessly showcased.

Harnessing our market-leading first-order crossover alongside the finest driver components, Mingus Orchestra achieves flawless time coincidence, as well as perfect time and phase coherence. This translates into record-low distortion, ensuring the reproduction of the most natural and dynamic sound possible.

Crafted with the utmost attention to quality, Mingus Orchestra represents the epitome of the series—a supreme expression of mastery.

FEATURES

- 4-way bass reflex
- 51mm and 20mm pure diamond drivers
- Accuton Cell drivers
- First order crossover
- Carbon fibre cabinet
- Jorma internal wiring
- Marten Isolators

See page 43 for finishes

STATEMENT EDITION

Mingus Orchestra can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

MINGUS

Septet

Mingus Septet stands as a formidable heavyweight, featuring a four-way design equipped with a total of seven drivers. Custom Marten pure diamond tweeters and beryllium high midrange drivers work in harmony to capture every detail with unparalleled clarity and precision. Complemented by two active and two passive bass drivers, the lower frequencies are rendered with deep, full, and meticulously controlled bass.

Our signature first-order crossover delivers an open, clean, and dynamic sound signature. Advanced damping mats, along with wooden tops and bottoms and an aluminium plate construction, ensure a neutral cabinet with exceptional resonance control. Further enhancing this control, Marten Isolators isolate the cabinet from the supporting surface, minimising resonance for an even purer audio experience.

FEATURES

- 4-way
- 1" Pure diamond tweeter
- 3" Pure beryllium high midrange
- First order crossover
- Jorma internal wiring
- Marten Isolators

See page 44 for finishes

STATEMENT EDITION

Mingus Septet can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

MINGUS

Quintet 2

Mingus Quintet 2 embodies all the hallmarks of a Marten speaker: full-range sound, deep bass, and wide dynamic range.

In its second iteration, we've doubled down on resonance control, implementing additional damping and incorporating solid wood tops and bottoms to render the cabinet even more neutral than its predecessor. Augmented by Marten Isolators, which effectively isolate the cabinet from its supporting surface, resonance is further minimised.

Driving this exceptional performance is a meticulously crafted crossover system, powering a suite of diamond, ceramic, and aluminium sandwich honeycomb drivers to deliver an unparalleled listening experience.

FEATURES

- 3-way bass reflex
- Pure diamond tweeter
- Accuton Cell drivers
- First order crossover
- Jorma internal wiring
- Marten Isolators

SERIES

Parker

The Parker series marks a pivotal advancement in product development. Each driver is custom-designed, affording unparalleled control over every component. Enhanced construction materials and Marten Isolators virtually eliminate cabinet resonance, while our innovative multi-diverse crossover technique ensures perfect harmony among elements. The result? A crystal clear soundstage, deep resonant bass, and exceptional dynamics.

EST

PARKER

Quintet

The Parker Quintet is a formidable 2.5-way floorstander, featuring a total of nine custom drivers and Jorma internal wiring. We've gone to great lengths to ensure that this speaker is resonance-free, with improvements to the cabinet construction and Marten Isolators. These features work together to eliminate unwanted vibrations and distortions, resulting in a powerful and controlled sound that faithfully reproduces the original recording.

FEATURES

- Multi-diverse crossover technique
- All custom drivers
- Passive radiators
- Jorma internal wiring
- High sensitivity
- M-board multi-layered cabinet
- Marten Isolators

See page 44 for finishes

DIAMOND EDITION

Parker Quintet can be upgraded to Diamond Edition, featuring a pure diamond tweeter, Jorma Statement internal wiring, more advanced crossover components and improved terminals.

PARKER

Trio

Parker Trio is a 2.5-way floorstander that's perfectly suited for any living space. Our custom-designed drivers work seamlessly with the advanced multi diverse crossover technique to deliver power and control. The speaker's design and resonance-free cabinet blend seamlessly with any interior, while the cutting-edge technology inside ensures a dynamic, crystal-clear sound, and enviable bass response.

FEATURES

- Multi-diverse crossover technique
- All custom drivers
- Passive radiators
- Jorma internal wiring
- High sensitivity
- M-board multi-layered cabinet
- Marten Isolators

DIAMOND EDITION

Parker Trio can be upgraded to Diamond Edition, featuring a pure diamond tweeter, Jorma Statement internal wiring, more advanced crossover components and improved terminals.

PARKER

Duo

Parker Duo, a 2-way stand speaker, builds upon our renowned reputation for exceptional bookshelf models. Engineered for unparalleled resonance reduction, it features custom drivers, passive radiators, and an advanced cabinet design. It delivers sound that is full of power, with deep, controlled bass. It's optimised for performance in large living spaces.

FEATURES

- Multi-diverse crossover technique
- All custom drivers
- Passive radiators
- Jorma internal wiring
- High sensitivity
- M-board multi-layered cabinet
- Marten Isolators
- Custom stand (optional)

DIAMOND EDITION

Parker Duo can be upgraded to Diamond Edition, featuring a pure diamond tweeter, Jorma Statement internal wiring, more advanced crossover components and improved terminals.

SERIES

Oscar

Created to meet the demand for premium sound at an accessible price point, the Oscar series represents a reimagining of Marten quality. Through the meticulous design of brand-new drivers and optimised build, we've maintained the signature Marten sound while achieving remarkable clarity and dynamic range. Experience an open, dynamic sound with controlled, powerful bass that defies expectations.

OSCAR

Trio

Oscar Trio presents the Marten sound at a more accessible price point: a significant milestone. Our chief designer Leif Olofsson created custom technology to achieve a level of performance worthy of our name. Oscar Trio delivers exceptional dynamics, a high resolution soundstage, and bass that is fuller and deeper than you might expect.

FEATURES

- Custom designed drivers
- True Marten sound
- 2-way
- Jorma internal wiring
- Competitive price-point

See page 45 for finishes

UPGRADE

- Magnetic cover
- Marten Isolators

OSCAR

Duo

Built from the ground-up, Oscar Duo sparked a design rethink to deliver Marten sound with new technology—bespoke drivers were created to make this possible. Oscar Duo is an exceptional, all-round living room speaker. With sound so solid and tight, it fills a room and feels like a speaker with a much larger footprint.

FEATURES

- Custom designed drivers
- True Marten sound
- 2-way
- Jorma internal wiring
- Competitive price-point

See page 45 for finishes

UPGRADE

- Custom stand
- Magnetic cover
- Marten Isolators

MARTEN

Isolators

We understand that reducing resonance is crucial to achieving exceptional sound quality. With Marten Isolators we have taken this to a new level, isolating the speaker completely from the floor and delivering unparalleled soundstage clarity.

“The use of Marten Isolators has proved so successful that we have rolled them out across our entire product range.”

Leif Olofsson • Chief Designer

PROTECT YOUR SOUND

Distortion and resonance are two key factors that can impact the sound quality of even the most high-end speakers. While our precision materials and finely-tuned components go a long way in reducing these factors, the speaker's position on a supporting surface can create its own resonance issues, resulting in a muddy soundstage.

QUALITY AS STANDARD

To tackle this challenge, we partnered with audio isolation experts, IsoAcoustics, to create Marten Isolators. These innovative isolators work by preventing vibrations from travelling down to the floor, effectively isolating the speaker from the room. This ensures that the floor cannot resonate unwanted sound back up into the speaker, reducing resonance and distortion, and eliminating dissonant sounds in the listening area.

FEATURES

- Dynamic bass with increased power and control
- Natural openness and clarity
- Optimised for cabinet weight
- Resists lateral movement and oscillations
- Reduces internal reflections

COMPANY

Our Story

In 1998, Leif Märten Olofsson founded Marten in Sweden, but the company's history goes back much further. Leif's grandfather, Josef Olofsson, crafted violins modelled after Stradivarius in the early 1900s. An instrument that was also played by Märten Larsson, Leif's maternal grandfather.

Leif's passion for speaker design began in the 1970s, when he made his first speakers in the family home. A hobby which keenly interested him from an early age. After Leif obtained his degree in electrical engineering, he started a career in kitchen design. On the side, he continued his true passion for speakers. He developed formative designs that would later serve as sketches for what would become Marten speakers.

Starting with the original Mingus model, Marten's product line has expanded, growing stronger with each iteration. The company's success and respect have grown steadily over time, fueled by Leif's dedication to creating speakers that accurately reproduce the truth and beauty of natural sound. Leif's desire to hear music as it is in real life, free of distortion or artificial colouring, is at the core of the Marten ethos.

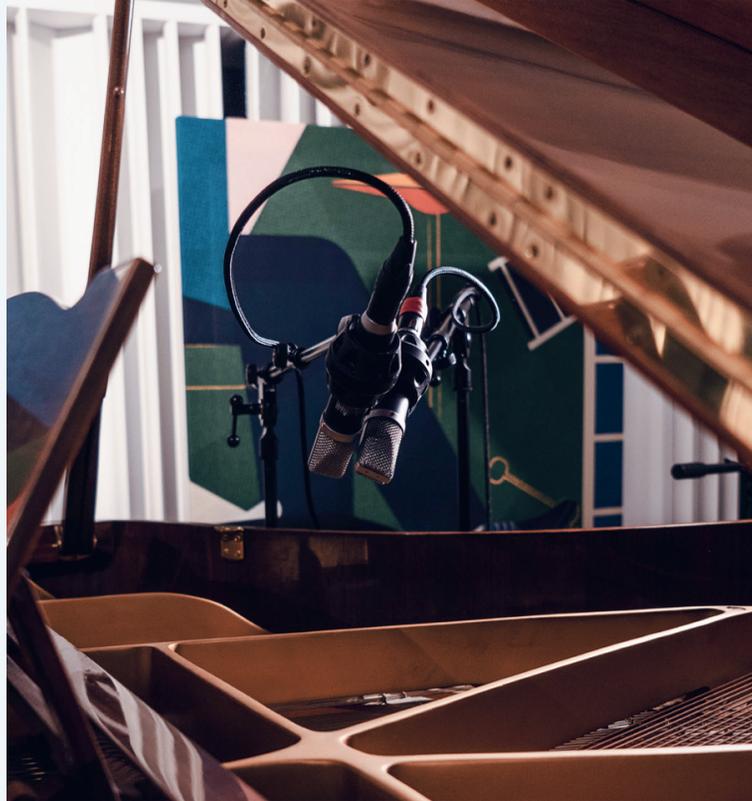

This vision has driven the company's product design and development from the beginning and continues to do so today. Despite its growth and success, Marten remains a family business, with Leif and his brothers, Jörgen and Lars Olofsson at the helm.

Josef Olofsson recreated with archive photos and Midjourney AI

COMPANY

Studio & Label

Marten speakers have always been designed with a deep appreciation for music and a commitment to delivering sound in its truest form.

In 2013, the company took this passion to the next level by building its own recording studio at its offices in Sweden, with the reference model Coltrane Supreme 2 as its inspiration. This dual microphone studio allowed Marten to create its first recording album, Supreme Sessions, which bridged the gap between live music and the home listening experience.

Coltrane Supreme 2 represented a new direction in Marten's design strategy, with the recording studio serving as a crucial component in the development process.

Thanks to this studio, Marten has been able to produce high-fidelity recordings, which it has released on its own record label, Marten Recordings. The label has worked with a variety of talented artists, including Rhythm Art Duo, Matti Ollikainen, and Duo Granmo Berg, with all recordings taking place in Marten's state-of-the-art studio in Gothenburg.

“It feels like a challenge to update Coltrane, but I can happily say that the new model has exceeded all expectations. You should hear how low the bass frequencies go.”

A handwritten signature in white ink on a dark background, reading "Leif Olofsson". The signature is fluid and cursive, with a small arrow pointing to the top of the first letter 'L'.
